Web Designing and Publishing

Complete, syllabus-faithful study document

MODULE	DURATION	WRITTEN MARKS
M2-R5.1	120 Hours 48 Theory + 72 Practical	100

Designed to make the official syllabus easier to read, revise and track — without dropping any listed topic.

1. Module at a Glance

Official module: Syllabus of Web Designing and Publishing (M2-R5.1)

Duration: 120 Hours — Theory: 48 hrs + Practical: 72 hrs

Purpose: Build practical skill in designing website layouts, understanding the structure and functionality of the World Wide Web, creating web pages with HTML/CSS/JavaScript/Angular JS, integrating multimedia and images, and learning how websites are published.

The module is designed for learners starting web designing irrespective of their current level of knowledge. It reflects the modern dependence of businesses on web-based applications.

Module Objectives

- Design and create effective web pages.
- Integrate graphics in web pages.
- Integrate various tools and techniques like HTML, CSS, JavaScript, Angular JS, etc.
- Design and edit images using tools.
- Embed the images in web pages.

Learning journey

No.	Unit	Core coverage
01	Introduction to Web Design	Web, websites, front end/back end, scripting, responsive design
02	Editors	Notepad++, Sublime Text Editor, file creation/editing/saving
03	HTML Basics	HTML structure, tags, tables, lists, forms, frames, HTML5, multimedia
04	CSS	CSS types, selectors, properties, tables, menus, image gallery
05	CSS Framework	W3.CSS framework, containers, panels, grid, components
06	JavaScript + Angular JS	Client-side scripting, variables, operators, conditions, events, validation, Angular basics
07	Photo Editor	Selection/paint/transform/text tools, layers, color/tone, filters
08	Web Publishing + Browsing	Hosting, standards, publishing, document management, search, HTTP, tools

2. Official Unit-wise Duration & Learning Objectives

Module Unit	Theory Hours	Practical Hours	Learning Objectives
Introduction to Web Design	2	3	After completing this unit, learner will be able to: • Know the types of web site. • Know the role of front end and back end application. • Understand the concept of client side scripting and server side scripting.
Editors	2	3	After completing this unit, learner will be able to: • Use different editors available for writing code. • Understand working of editors.
HTML Basics	10	15	After completing this unit, learner will be able to: • Develop static website using different HTML Controls.
Cascading Style Sheets (CSS)	10	15	After completing this unit, learner will be able to: • Understand the purpose of CSS. • Understand the role of CSS in web sites. • Understand roles of effects in web site.
CSS Framework	6	9	After completing this unit, learner will be able to: • Use CSS Framework to develop web site effectively.
JavaScript and Angular JS	10	15	After completing this unit, learner will be able to: • Apply client side scripting. • Add validations and checks on forms (web pages).
Photo Editor	6	9	After completing this unit, learner will be able to: • Edit images and embed in web pages.
Web Publishing and Browsing	2	3	After completing this unit, learner will be able to: • Finally be able to publish the web sites.

Duration check: **48 theory hours + 72 practical hours = 120 hours.**

3. Marks Distribution

No.	Module Unit	Written Marks (Max.)
1	Introduction to Web Design and Editors, HTML Basics	25
2	Cascading Style Sheets (CSS)	20
3	CSS Framework	15
4	JavaScript and Angular JS	20
5	Photo Editor, Web Publishing and Browsing	20
6	Total	100

Exam focus

The official written-mark distribution gives the highest weight to **Introduction + Editors + HTML Basics (25)**, followed by **CSS (20)**, **JavaScript + Angular JS (20)**, and **Photo Editor + Web Publishing + Browsing (20)**. CSS Framework carries **15** marks.

4. Detailed Syllabus — Complete Topic Checklist

Use this section as a master checklist. Every topic listed in the supplied syllabus pages is retained below, arranged for cleaner study and revision.

16.6 (i) Introduction to Web Design

■ Introduction of Internet	■ Front End
■ WWW	■ Back End
■ Website	■ Client and Server Scripting Languages
■ Working of Websites	■ Responsive Web Designing
■ Webpages	■ Types of Websites (Static and Dynamic Websites)

16.6 (ii) Editors

■ Downloading free Editors like Notepad++	■ File creation and editing
■ Sublime Text Editor	■ Saving
■ Making use of Editors	

16.6 (iii) HTML Basics

■ HTML: Introduction	■ Text Area
■ Basic Structure of HTML	■ Dropdown
■ Head Section and Elements of Head Section	■ Radio buttons
■ Formatting Tags: Bold, Italic, Underline, Strikethrough	■ Check boxes
■ Div	■ Submit and Reset Buttons
■ Pre Tag	■ Frames: Frameset, nested Frames
■ Anchor links and Named Anchors	■ HTML 5 Introduction
■ Image Tag	■ HTML5 New Elements: Section, Nav, Article, Aside
■ Paragraphs	■ Audio Tag
■ Comments	■ Video Tag
■ Tables: Attributes — Border, Cellpadding, Cellspacing, height, width	■ HTML5 Form Validations: Require/Required Attribute, Pattern Attribute, Autofocus Attribute
■ TR, TH, TD	■ email type
■ Rowspan, Colspan	■ number type
■ Lists: Ordered List, Unordered List, Definition List	■ date type
■ Forms	■ Range type
■ Form Elements	■ HTML embed multimedia
■ Input types	■ HTML Layout
■ Input Attributes	■ HTML Iframe
■ Text Input	

16.6 (iv) CSS

■ Introduction to CSS	■ CSS Lists
■ Types of CSS	■ CSS Tables
■ CSS Selectors: Universal Selector, ID selector, Tag Selector, Class Selector, Sub Selector, Attribute Selector, Group Selector	■ CSS Menu Design
■ CSS Properties: Back Ground properties, Block Properties, Box properties, List properties, Border Properties, Positioning Properties	■ CSS Image Gallery

16.6 (v) CSS Framework

■ Web Site Development using W3.CSS Framework	■ W3.CSS Fonts
■ W3.CSS Intro	■ W3.CSS Text
■ W3.CSS Colors	■ W3.CSS Tables
■ W3.CSS Containers	■ W3.CSS List
■ W3.CSS Panels	■ W3.CSS Images
■ W3.CSS Borders	■ W3.CSS Grid

16.6 (vi) JavaScript and Angular JS

■ Introduction to Client Side Scripting Language

■ Basic Form Validations in JavaScript

■ Variables in Java Script

■ Introduction to Angular JS

■ Operators in JS

■ Angular JS Expressions

■ Conditions Statements

■ Angular JS Modules

■ JS Popup Boxes

■ Angular JS Directives

■ JS Events

16.6 (vii) Photo Editor

■ Features of Photo Editing

■ Layers

■ Tools: Selection Tools

■ Brightness / Contrast

■ Paint Tools

■ Improve Colors and tone

■ Transform Tools

■ Filters

■ Text Tool

16.6 (viii) Web Publishing and Browsing

■ Overview	■ Web Page Design Considerations and Principles
■ SGML (Standard Generalized Markup Language)	■ Search and Meta Search Engines
■ Web hosting Basics	■ WWW
■ Documents Interchange Standards	■ Browser
■ Components of Web Publishing	■ HTTP
■ Document management	■ Publishing Tools

5. Reference Books / Study Material

No.	Book / Study Material	Author / Publisher
1	HTML5, Black Book	Kagent Learning Solution Inc, 2014
2	Mastering HTML, CSS & JavaScript Web Publishing	Lemay Laura, BPB publications
3	HTML & CSS: The Complete Reference	Thomas Powell
4	Web Design	McGraw-Hill
5	Learning Angular JS	Brad Dayley, Pearson

6. Smart Revision Order

A practical way to move through the syllabus is to build from structure → styling → interactivity → media → publishing:

Phase	Focus	Outcome
Phase 1	Web + Editors	Understand Internet/WWW, website working, front end/back end, scripting and editor workflow.
Phase 2	HTML	Build complete static pages using structure, text, links, images, tables, lists, forms, frames and HTML5.
Phase 3	CSS + W3.CSS	Style pages with selectors/properties, menus, tables, galleries and the W3.CSS framework.
Phase 4	JavaScript + Angular JS	Add client-side logic, events and form validation, then learn Angular JS expressions, modules and directives.
Phase 5	Photo Editing	Prepare and improve images, then embed them in web pages.
Phase 6	Publishing + Browsing	Understand hosting, standards, document management, HTTP, browsers, search and publishing tools.

Syllabus boundary note

The supplied pages begin Module 17 immediately after this module with “Programming and Problem Solving Through Python Language (M3-R5.1)”. This document intentionally covers **Module 16 — Web Designing and Publishing (M2-R5.1)** only.

Prepared as a clean study companion from the four syllabus pages supplied in this conversation. Official wording has been preserved in substance; formatting, grouping and checklist presentation have been improved for easier revision.
